TEXTILE EDITOR

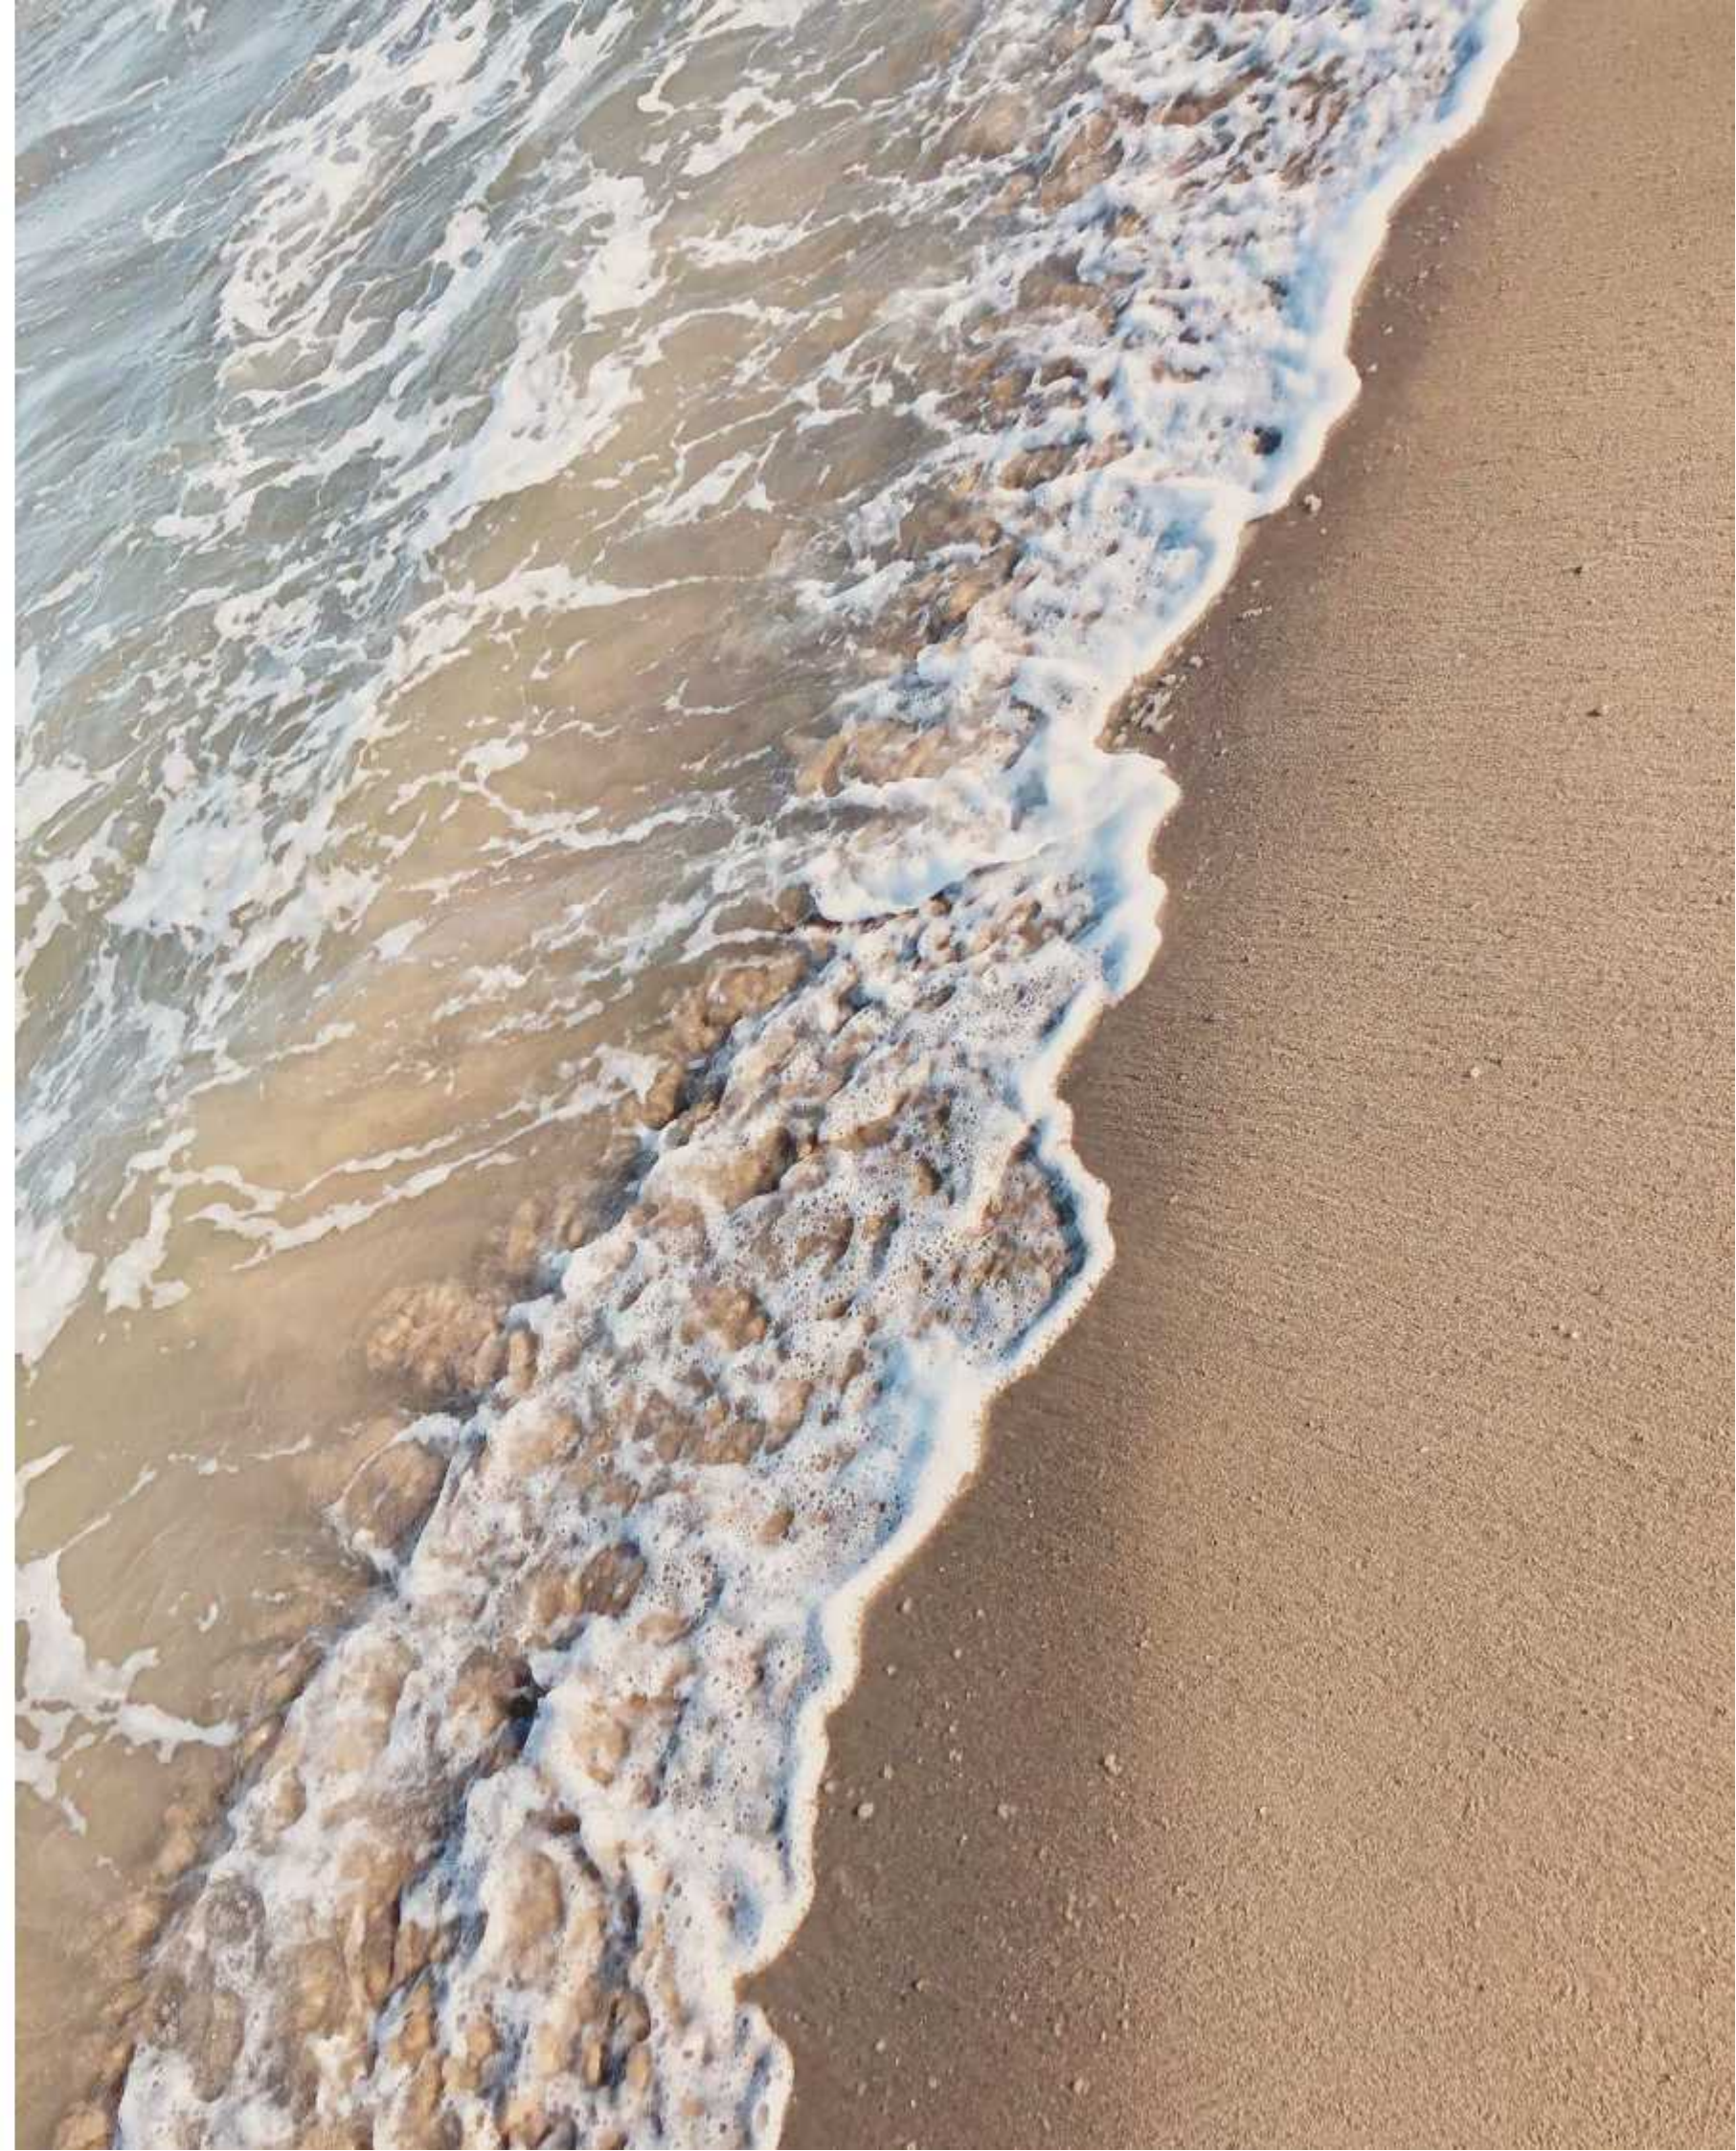

THE SEA IS IN OUR ESSENCE

This year we have been transformed and enriched by things that are close to us. Our inspiration comes from the places we know best, those that are part of our essence and where the sea is always present.

Altea and Zahara are two collections that have been created to last. Their simplicity is a sought after quality and their natural and sustainable composition alludes to a way of life that now seduces us as if it had become a necessity. Complementing the two collections, Candela, our par excellence linen, grows and is inspired by the shades of the earth and the sea. This time, we reinforce its colouring with 35 new tones rounding out a unique chromatic range.

We have chosen to generate more ethical, responsible, circular products. The reuse of natural fibres such as recycled cotton or ecological linen, all of them double width and manufactured locally, become the common thread of the three collections.

We hope that these fabrics will give you the feeling of simplicity and well-being that we seek.

ALTEA

THE LEVANTE BREEZE

Proud of our landscape, we pay tribute to one of the most beautiful places on the Costa Blanca, Altea.

The Dome of the Mediterranean inspires us with its pebbled streets gently descending to the sea, winding between the white houses and the blue sky.

Inspired by the coves and landscape of Altea, we have created light striped double width fabrics moved by the Levante breeze. Their purpose will be to shade the light and make us enjoy the three thousand hours of sunshine a year that this unique enclave provides.

An environmentally friendly approach has guided our steps to use recycled cotton in all the fabrics that make up the collection, so that they have the least impact on the environment.

Less dyes are used in the colouring, as there are just 5 shades chosen, all of them with natural colour threads in the warp, seeking serenity, emulating the whitening effect of the Alicante coast sunrise.

Lime, sand, oats, ginger, sky & sea.

CANDELA

CHARACTER AND UNIQUENESS FOR ESSENTIAL LINEN

Candela is a full-bodied double width linen, 460 gr. per square metre, which has acquired a place of honour in Alhambra. Its success has led us to extend the colour range to 66 shades.

The washed finish gives it a casual look that contrasts with the gravity of its drape and the beauty of its pleats.

The colours speak of the land and the sea, they speak of our Mediterranean, with a special emphasis on clay tones, spicy ochres or a wide range of marine blues and greens.

Suitable for upholstery, curtains or bedspreads, its relaxed character exholes freshness and a particular consistent softness.

Candela is an essential basic that dialogues in perfect harmony with all Alhambra. It is available in normal width and double width. As we already know, its versatility will make it one of the firm's basics.

ZAHARA

WIND, SAND & SALT

ZAHARA honours the natural beaches of Tarifa, a place that has not changed, where you can still breathe a seafaring atmosphere and traces of past civilizations.

True to its essence, its bay and golden sand make Zahara a magical place that reflects a state of infinite calm.

The wind, as protagonist, moves the dunes and gives you back an intense sensation of freedom. This bohemian spirit is present in double width, reversible and simple fabrics.

Elaborate textures, small motifs and natural fibres such as 100% linen and recycled cotton, all presented in double width, come together in harmony.
